

We went for a boat ride and now we will draw what we saw!

It's going to be a lighthouse. Let's begin by making a tower shape.

Next we put a turret on top, then draw two windows and a door.

The beacon light is very important, and this is how you make it.

Now let's color the lighthouse, put it on an island and add a sea gull.

This square is left blank so that you can make a lighthouse too.
